URBAN DISTRICT COUNCIL OF ADWICK-LE-STREET

Public Health Department,
Council Offices,
Village Street,
Adwick-le-Street,

September, 1962

To the Chairman and Members of the Adwick-le-Street
Urban District Council

Mr. Chairman and Gentlemen,

I have pleasure in submitting my Annual Report on the health of the inhabitants for 1961. I have also included a report on the personal health services carried out under my direction as Divisional Medical Officer.

The Vital Statistics are an indication of the health and welfare of the inhabitants and those for 1961 show:-

1. The population shows a reduction to 18,180. The population has shown small fluctuations over the last ten years but has not exceeded 19,000 since 1947.
2. The birth rate shows a slight increase over 1960.
3. The number of deaths of children under one year of age was the same as 1960.
4. The death rate was slightly increased. There were ten fatal road accidents during the year.
5. No mother died in childbirth
6. There was an increase in the number of cases of infectious diseases, mainly due to measles. One case of poliomyelitis occurred.

I would like to express my appreciation to Mr. Senior, the Public Health Inspector, who has been responsible for the writing of the second part of this report on the sanitary circumstances of the area, and the staff of the Health Department for their valued help and co-operation, and also to all members, professional and clerical of the staff of the Divisional Office.

I would also express to you, Mr. Chairman, and the Councillors many thanks for the courteous reception of my reports throughout the year.

I have the honour to be, Gentlemen,

Your obedient Servant,

J. FERGUSON,

Medical Officer of Health.

COMMENTS ON VITAL STATISTICS

Population and Birth Rate

The Registrar General's figures show a decrease in the population, from 18,620 to 18,180.

The Birth Rate shows an increase compared with 1960.

There were 22 illegitimate births compared with 23 in 1960. The Moral Welfare Committee of the Archdeaconry of Doncaster and Rotherham continues to be most helpful in these cases and arranges, with financial assistance from the West Riding County Council, accommodation for unmarried mothers in their Church Homes, when requested.

Premature Births

A table is appended showing details of the premature infants born in the area.

| Birth Weight | Total Born | | | | No. who died under 28 days | | No. who survived 28 days |
|-----------------|------------|----------------|------------|----------------|-------------------------------|----------------|--------------------------------|
| | Dead | | Alive | | | | |

| 4 - 5½ lbs. | — | 1 | 6 | 10 | 1 | — | 15 |
| Total ... | — | 4 | 7 | 11 | 1 | — | 17 |

Death Rate

The Infantile Mortality rate shows a decrease from 28.4 in 1960 to 26.6 in 1961 per 1,000 live births. The tables show that three occurred in the first week of life.

The number of deaths was increased by 17 bringing the total deaths for 1961 to 207 giving a crude death rate of 11.4. There were 33 deaths from Cancer compared with 30 in 1960 and of these 5 males and 1 female compared with 2 males and 2 females in 1960 died from Cancer of the Lungs. Heart diseases and associated diseases continue to be the commonest cause of death, there being 56 such cases in 1961 compared with 64 in 1960. There was 1 death from Tuberculosis compared with 2 in 1960.

There was no death associated with childbirth.

2. MATERNITY SERVICE

As more General Practitioners book maternity cases and carry out ante-natal examinations in their own surgeries there is a corresponding reduction in the number of attendances at Local Authority clinics where a medical officer is in attendance.

Continued co-operation is maintained with General Practitioners and as each relaxation and health education class is commenced practitioners are now notified in addition to personal visits from Midwives and Health Visitors.

Where practitioners hold ante-natal sessions in their surgeries midwives are in attendance, if duty permits.

3. HOME NURSING

The Home Nursing Service was fully staffed during the year, and is now adequate for all demands on this service. The nurses work under the direction of the general practitioners, and the tables show an increasing use of this service.

District Nursing (Adwick-le-Street) 1961

| Type of Case | No. of cases attended by Home Nurses | No. of visits made by Home Nurses |
|---------------------|--------------------------------------|-----------------------------------|
| Medical | 386 | 11,833 |
| Surgical | 80 | 1,139 |
| Tuberculosis | 12 | 628 |
| Total | 478 | 13,600 |

4. HOME HELPS

This division has been allocated the equivalent of 30 full-time home helps, plus the equivalent of 0.5 full-time home helps from the central pool. During the year 86 part-time home helps were employed, and the accompanying table shows the work done. This service, together with the other health services, e.g., Home Nursing and visits by Health Visitors plus the increased provision by the Local Authority of aged persons bungalows and flats and the Wardens' Scheme (of which details appear in a later paragraph) result in many an aged sick person remaining in their own homes as they so earnestly desire to do.

6. WELFARE OF THE AGED

The main function of the Committee for the Welfare of the Aged, sponsored by the Adwick-le-Street Council, which consists of members of that authority together with persons interested in the aged, is the Chiropody Service.

Chiropody Service

This service is now held at Woodlands and Carcroft Child Welfare Centres and Highfields Welfare Hall, and is greatly appreciated by the old folks who are thus enabled to get about in comfort.

The attendances during the year are given below:-

| | Woodlands | Carcroft | Highfields |
|---|-----------|----------|------------|
| No. of clinics held | 80 | 47 | 16 |
| No. of persons attended ... | 169 | 96 | 46 |

| No. of domiciliary treatments:- | | | |
| Pensioners 106; Physically Handicapped 3. | | | |
| No. of persons treated:- | | | |
| Pensioners 57 and 1 Physically Handicapped. | | | |

In addition to aged persons, this service has been extended to expectant mothers and physically handicapped persons and is a free service to all.

Warden Scheme

The Warden Scheme continues to function satisfactorily. There are now five wardens and two relief wardens on duty and their daily visits to the aged persons are a source of satisfaction. A few emergencies have arisen and these have been dealt with most ably by the wardens.

Cleanliness Inspections

During the year routine cleanliness inspections were carried out at every school in the division by the School Nurses and a total of 12,764 inspections and re-inspections were made. 227 pupils were found to be infested but in the majority of cases infestations were slight. Treatment and advice is given by the School Nurses. No Statutory Notices were issued during the year.

SPECIAL EXAMINATIONS

School Children

In accordance with the requirements of the Education Act, 1944 and the Children and Young Persons Act, a number of children were referred by the Education Department which necessitated special examinations.

During the year 326 such children were seen with the following recommendations.

| | |
|--|-------|
| 1. To remain on Register of Handicapped Pupils ... | 1 |
| 2. To continue attendance at present school | 8 |
| 3. Certificates of freedom from infection before returning to special school after holiday. | 65 |

8. Mental Health Service

This service continues to work smoothly and the Mental Welfare Officers, with the Senior Mental Welfare Officer, have developed a close liaison with the medical staff at the Mental Hospital and the Consultants at the Psychiatric Out Patients Clinics. Practitioners have been informed of the availability and the areas of the officers. For night calls practitioners have been advised to telephone the Ambulance Depot who are supplied with the rota for all weekend, night and holiday duties. This help from the staff at the Ambulance Depot has been of the greatest value.

10. ASCERTAINMENT OF DEAFNESS

Provision was made for the opening of an Audiology clinic at special premises in the Yorkshire School for the Deaf in Doncaster in March, 1961.

The findings at this clinic have underlined the importance of early diagnosis of all degrees of deafness in young children - and the earlier the better in order that medical, educational and auditory help can be given as soon as possible.

The personnel in attendance have been trained in the audiological assessment of young children. The initial suggestion of one clinic per month has proved inadequate and at least two clinics per month are necessary.

11. AMBULANCE FACILITIES

This scheme is still operating satisfactorily. There is a free ambulance and sitting car twenty four hour service for everyone. The vehicles are stationed at Yarborough Terrace, Bentley and are available on request from doctors and nurses or from the general public in an emergency.

12. SPECIAL EXAMINATIONS

Throughout the year special examinations are carried out for the Council of all staff (officials and workmen) who commence work for the Council. Medical examinations and consultations are also held with members of the staff who have prolonged absence with sickness.

Similar examinations are carried out for the West Riding County Council and also of intending teachers prior to admission to college.

SECTION C

SANITARY CIRCUMSTANCES OF THE AREA

1. Water.

This District has representatives on the Don Valley Water Board. The water supplied to the whole of the area is sufficient and wholesome.

2. Rivers and Streams

The Mill Stream and the Ea Beck flow through the area.

3. Drainage and Sewerage.

The effluent from the sewage works continues to be classified as satisfactory. With the erection of the new Council Houses, the capacity of the existing sewage works is now reaching its maximum.

4. Scavenging.

This is carried out by the Council's Surveyor. Refuse is tipped on land adjoining the Sewage Works, the Ea Beck at Bentley Moor Lane and Crossfield Lane.

5. Rainfall and Temperature.

Your Surveyor, E. A. Daubney, Esq., has kindly supplied me with a copy of the recording of rainfall and temperature throughout the year.

Tuberculosis.

No action was taken under the Public Health (Prevention of Tuberculosis) Regulations, 1953 or under Section 172 of the Public Health Act, 1936.

There was 1 death attributed to Tuberculosis during the year, giving a death rate of 0.06 per 1,000 population.

The number of cases in the Tuberculosis Register at the 31st December, 1961, compared with the previous year was:—

| | 1960 | | 1961 | |
|-------------|------|----|------|----|
| | M | F | M | F |
| Respiratory | 65 | 49 | 70 | 47 |

Care and After-Care of Tuberculosis

A special Committee for this purpose has been established for some years. The Committee consists of lay members and representatives of the Medical Officers of Health in Doncaster and district. Financial assistance is given to the Committee by the West Riding County Council and the Doncaster County Borough.

It has been possible to help many cases with clothing, bedding etc. This Committee carries out most useful work and the advice of the special Health Visitors for Tuberculosis is always available.

The County Council also provides free milk up to two pints per day to cases recommended by the Tuberculosis Officer.

URBAN DISTRICT COUNCIL OF ADWICK-LE-STREET ANNUAL REPORT OF THE PUBLIC HEALTH INSPECTOR

W. SENIOR, M.A.P.H.I.
FOR THE YEAR 1961

To the Chairman and Members of the Urban District Council of
Adwick-le-Street

Gentlemen,

I have pleasure in submitting my annual report for 1961, in which are set out details of inspections made and notices served, both informal and formal, under the provisions of the several Acts of Parliament, and ministerial regulations, which empower Local Authorities to carry out their duties. Details of work carried out as a result of services of notices are also recorded.

HOUSING ACTS

(a) **Slum Clearance** — all the houses in the six Slum Clearance areas have now been demolished although in two cases there is some site tidying up to be done.

During the year seven individual houses were represented as being unfit for human habitation. Demolition Orders were made in respect of six of them and a Closing Order in respect of the seventh. There were no appeals. Four of the tenants have been rehoused and two of the houses demolished.

(b) **Repair of Defective Dwelling Houses** — During the year 97 houses were repaired. Of these 91 were repaired after informal action had been taken. In six cases only was statutory action necessary.

(c) **Overcrowding** — There is still some overcrowding in the District notwithstanding a large increase in the number of new dwelling houses and a reduction in the population.

RENT ACT, 1957.

There have been no applications for certificates of disrepair during 1961. Five applications were received for standard grant and all were approved.

CARAVANS

Small encampments of caravans have continued to occupy grass verges on the outskirts of the District. It would seem that unless a strict supervision of these places is maintained that the matter could get out of control.

PUBLIC HEALTH ACTS

Many nuisances have been abated during the year. One of the difficulties causing drainage problems arises from mining subsidence which has entailed drainage reconstruction.

There has been one prosecution for exchanging toys for rags in which a conviction was secured.

AIR RAID SHELTERS

The Public Health Department would appear to be the General Public's target for securing the demolition of air raid shelters. A fair amount of time is taken up in investigating complaints, preparing reports and making representation upon air raid shelters. Progress is slow but the results are worthwhile.

Unfortunately it seems that demolition will not be approved unless shelters are partially demolished and structurally dangerous.

MEANS OF ESCAPE IN CASE OF FIRE

By virtue of the Factories Act, 1961, means of escape in case of fire in factories will, in future, be certified by the Fire Authority, in our case the County Council. Prior to the passing of the Act the certifying authority was the District Council. It is pleasing to be able to report that in all factories in this District the means of escape in case of fire were considered to be satisfactory and all certificates have been handed over to the County Council.

RODENT CONTROL

Every effort is made, each year, to survey the District completely for rodent infestation. It is not always possible to visit each individual dwelling house or hut although this is attempted.

Rat infestation exists mainly where the food supply is available. During the past year 159 treatments have been made as a result of which 431 rat bodies and 54 mouse bodies have been recovered and disposed of. It is felt that the number of live rats left after a treatment is of more importance than the number of bodies recovered.

In conclusion I would like to express my appreciation to the Chairman and Members of the Council and the Committees for their assistance and consideration of the many and varied problems which have arisen throughout the year.

ICE CREAM (Heat Treatment Etc.) REGULATIONS, 1947-52.

The Regulations broadly require that, subject to certain qualifications, the ingredients of ice-cream shall be heat-treated after being mixed, and that the mixture shall then be cooled until the freezing process has begun. After freezing, the ice-cream must not be sold unless it has been kept at a temperature of not more than 28°F., or if its temperature has risen above 28°F, unless it has again been heat treated and then kept at not more than 28°F after being frozen.

In the circular accompanying the regulations it is stated that as yet no test has been devised, the reliability of which is sufficiently established to justify its use as a statutory test, non-compliance with which would constitute an offence. However, attention is being drawn to a form of methylene blue test, and it is suggested that if out of the four grades recommended ice-cream consistently fails to reach Grades 1 and 2, it would be reasonable to regard this as indicating defects of manufacture or of handling which calls for further investigation.

Of the 110 ice-cream samples taken:—

105 or 95.45% samples were in Grade 1—Satisfactory.

5 or 4.55% samples were in Grade II—Satisfactory.
